Dear Valued Customer:

At MB Sturgis we are on a constant quest to make our products both safer for the end user and cost competitive for our customers, all while maintaining an unwavering sacrifice to the high level of quality you have come to expect from MB Sturgis Inc.

We have again accomplished these goals by developing our new quick disconnect Thermo Sleeve. The Thermo sleeve acts as a built in safety feature by disengaging the plug when the temperature exceeds 450 degrees F, cuts cost by using an alternative material to combat the ever rising price of brass and maintains the same high level of quality you expect from an MB Sturgis product for years of use under even the most extreme conditions.

The new Sturigi-Safe line of quick disconnects is certified through CSA to ANSI Z21.41 / CAN 6.9 and maintains all of the same specs our current product offers. If you have any additional questions regarding this change, please contact us by phone at (888) 291-6665 or email us at info@mbsturgis.com. For a copy of the CSA Certification, please visit our web site at www.mbsturgis.com and go to the documents section under the Media & Resources Heading.

Best Regards,

Bill Diel
